

Rhode Island: Take advantage of remote solar

Go green and save money. It's that simple. This solar savings program is the easiest way to save money while reducing your organization's carbon footprint at the same time. Receive the benefits of solar without using your own land or buildings, or investing any capital upfront.

How it works

Solar power is generated by a large solar system in Rhode Island which delivers energy to the grid. Our customers then receive credits on their electricity bill at a discounted rate from the power generated from the solar plant. Any excess bill credits generated in a given month roll over to the next month.

The benefits

- ✓ Potential savings of up to 30% on your electricity bill
- ✓ No capital investment and no maintenance cost = no risk
- ✓ All the benefits of solar without having to build it on site
- ✓ Economies of scale from large-projects lead to increased cost savings
- ✓ Protection against rising utility rates – as utility rates rise, so do your bill credits
- ✓ Support for a sustainable future, your commitment will support further solar development and jobs in Rhode Island

Exclusively available for:

Public Housing
Authorities

Hospitals

Educational
Institutions

Municipalities

Non-Profits

Government

Reduce your carbon footprint and increase sustainability with worry free solar.
